

# Czech Rocket Society

Czech Rocket Society is an **independent association** for **Czech university and secondary school students** who are interested in **cosmonautics and rocketry**. Members of the society **study** not only across the Czech Republic, but also abroad.

## The future of space industry

We give students and young professionals the **opportunity** to put their knowledge into practice, while learning independently, **testing and experimenting**. We want to take a **holistic approach** to rocketry and aerospace, so we are interested not only in the technical standpoint, but also in the **legality** of rockets and flying.

## Our projects and other activities

We **promote** and expand interest in **rocket science**. We participate in educational events, visit trade fairs and organize the **Czech Rocket Challenge competition** for university and high school students from the Czech Republic.

Examples of our current projects:

### StarFox

liquid rocket engine demonstrator

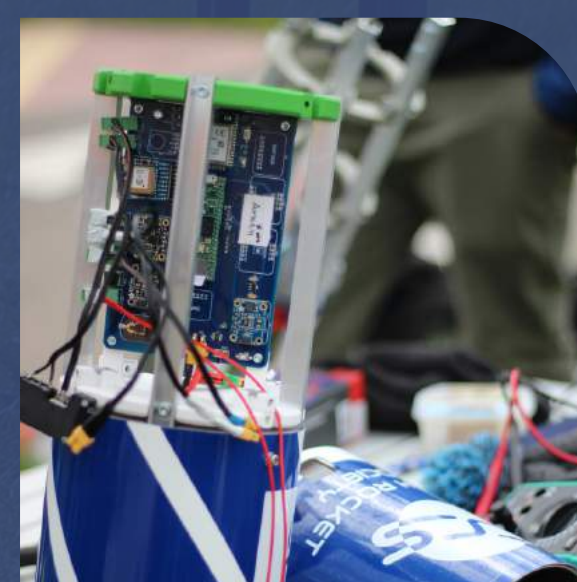

### Sherpa

launch vehicle for secondary school CanSat competition

### Solids

development and testing of solid fuel engines

### Avionics

development of flight computers, SW and HW for rockets

### Recovery

development of parachute system for rockets
